

Boogie - A Vibrant Subculture Memecoin

What is Boogie?

Boogie is a vibrant subculture memecoin built by AI and community collaboration. We sought out to create a tangible ecosystem where crypto utility and vibing collide. Our goal is to grow a vibrant culture and positive energy in the crypto space and Boogie is leading the way.

Who is \$Boogie?

Boogie is a passionate frog, with a love for dancing that takes center stage—his energy is contagious and will capture your heart. Boogie isn't just our mascot; he's our life coach, and a reminder to dance through the storm, embrace life's uncertainties, and celebrate the little victories.

Governance and Decentralization

Boogie's fair launch and fully renounced smart contract highlights its commitment to decentralization and community empowerment. This approach creates a trust centric environment where every holder influences the project's future. The engaged community contributes through ideas, marketing, and creative endeavors, leading to a vibrant ecosystem. By prioritizing decentralization, Boogie minimizes risks associated with centralized projects.

Usage and the Deflationary Nature of Boogie

Boogie Burning - Our unique platform allows you to initiate a token burn with just a click while enjoying Boogie's smooth moves and grooves! The burn process is a key feature of our tokenomics. By participating in Boogie token burns, you help reduce the total supply—this can potentially increase the value of your remaining tokens as demand rises.

Boogie Staking is another key feature of our ecosystem to earn while you burn.

Boogie Bot: The Boogie Trading Bot allows traders to snipe their trades so they can have a fair advantage.

.Tokenomics:

- Total Supply: 100 Trillion

Initial Token Distribution:

- Community Allocation 75%
- Burn Allocation 10%
- Team Allocation: 10%
- Marketing: 5%

Key Features:

- No Taxes on Transactions:
- Renounced Contract Ownership: The smart contract ownership has been fully renounced, ensuring true decentralization where no single party has control over the token.
- Community-Driven
- All Coins in Circulation
- Liquidity Locked for 365 Days

Blockchain: Built on the Solana blockchain, Boogie adheres to the widely adopted Solana standard, ensuring speed, compatibility, security, and efficiency.

Roadmap: A Community-Driven Movement that will dictate the road taken and the final destination to the top of the CMC. Please visit the website (Boogie.fun) for a more detailed roadmap.

Disclosures:

This text outlines several important legal disclaimers and considerations about the use and trading of the cryptocurrency Boogie.

Here's a summary of the key points from each section:

Risk Disclaimer

Volatility: Please invest responsibly. Boogie, like all cryptocurrencies, is subject to significant price fluctuations. Never invest more than you can afford to lose.

Non-Investment: Engaging in the Boogie ecosystem is not viewed as an investment, and participants must understand the associated risks.

No Profit Guarantees: Not everyone will get rich buying Boogie so there are no guarantees of returns or profits when participating.

Regulatory Compliance

Not a Security: Boogie does not qualify as a security under current laws, including interpretations like the Howey Test.

Compliance with Regulations: Buyers must adhere to global AML and KYC regulations. Individuals should verify compliance with local laws when acquiring Boogie.

No Ownership

Decentralization: Boogie operates without a central authority, allowing anyone to use it in compliance with applicable laws.

No Financial Advice

Informational Purpose: The whitepaper does not provide financial, investment, or trading advice. Professional consultation is recommended for financial decisions.

Jurisdictional Restrictions

Regional Considerations: Availability of Boogie may be limited or prohibited in certain jurisdictions. Participants must ensure compliance with local laws.

Privacy and Data Protection

Boogie values the privacy of its community. While the project does not collect personal data, interactions with third-party services are subject to their privacy policies.

These disclaimers serve to inform potential users about the nature of the cryptocurrency, the risks involved, compliance requirements, and privacy issues. It is crucial for individuals considering participation in the Boogie ecosystem to thoroughly read and understand these disclaimers.
